

Ex. No. 1	Design A Website Using HTML5
Date of Exercise	09.07.2026
GitHub Host Link	https://github.com/TheepanURK24CS1099/WEB-TECHNOLOGY-LAB.git

Aim:

To design and develop a simple yet structured HTML5-based website using various essential tags and features that demonstrate a clear understanding of semantic elements and formatting techniques.

Description:

This exercise involves creating a basic website consisting of a single web page structured using HTML5. Students are expected to showcase proper usage of fundamental HTML tags and implement different types of content, including headings, images, tables, lists, hyperlinks, and comments. The webpage should visually represent the application theme (e.g., tourism, food delivery, hospital, personal blog) of the student, while effectively applying background and text colors for good design aesthetics.

Procedure:

1. Based on the theme or concept for your web application (e.g., Travel Site, Tech Blog, Restaurant, Online Portfolio, etc.).
2. Create a new HTML5 file (index.html) in a text editor or IDE (e.g., VS Code, Notepad).
3. Begin with the appropriate `<!DOCTYPE html>` declaration.
4. Use required semantic tags such as `<html>`, `<head>`, `<meta>`, `<title>`, and `<body>`.
5. Within the body:
 - a. Insert a main heading using `<h1>` and section subheadings using `<h2>` or `<h3>`.
 - b. Add multiple `<p>` tags to include relevant content.
 - c. Use different hyperlinks:
 - External link (with `target="_blank"`)
 - Internal link (to another section using id)

```
h1 {
    text-align: center;
    color: #8e24aa;
}

h2 {
    color: #6a1b9a;
}

table {
    width: 75%;
    border-collapse: collapse;
}

table,
th,
td {
    border: 1px solid #5d4037;
    padding: 10px;
}

th {
    background-color: #8e24aa;
    color: white;
}

img {
    border: 3px solid #8e24aa;
    border-radius: 10px;
}

a {
    color: #1565c0;
    text-decoration: none;
}

a:hover {
    text-decoration: underline;
}

div {
    margin-bottom: 25px;
}

</style>
</head>
