

Ex. No. 4	Develop a Sign-In and Sign-Up Page with Navigation Bar using CSS
Date:	30.07.2026
GitHub Host Link	https://github.com/TheepanURK24CS1099/WEB-TECHNOLOGY-LAB.git

Aim:

To design and develop a responsive webpage using HTML5 and CSS3 that includes a navigation bar with a dropdown menu, a Sign-In form, and a Sign-Up form, providing an attractive and user-friendly authentication interface with proper layout, styling, and navigation.

Description:

This exercise extends the wildlife conservation themed website built in the earlier exercises by adding a dedicated authentication page. It focuses on constructing a header containing a logo badge and the site title, a horizontal navigation bar with menu items such as Home, About, Model, and Others, and a dropdown menu implemented under the Home item using CSS to list focus categories like Big Cats, Elephants, Birds, and Forests. The main content area places a Sign-In form and a Sign-Up form side by side using Flexbox, styled with rounded corners, shadows, a background image, and hover effects on links, dropdown items, and buttons. A footer section displays the organization's address and copyright information, giving students hands-on practice with CSS-based navigation design, dropdown implementation, form styling, and responsive layout without using JavaScript.

Procedure:

1. Plan the sections of the webpage — header with logo and title, navigation bar with a dropdown menu, Sign-In form, Sign-Up form, and footer — based on the wildlife conservation theme.
2. Open the existing HTML5 file (index.html) from the earlier exercises in a text editor such as VS Code and add the header markup containing the logo badge and the site title.
3. Build the navigation bar using an unordered list with menu items Home, About, Model, and Others, and nest a dropdown list of focus categories under the Home item.
4. Add a section containing two form boxes — one for Sign-In with username/email and password fields, and one for Sign-Up with name, email, and password fields — each ending with a submit button.
5. Within the <style> tag, define CSS3 rules: use display: flex, justify-content, and gap to align the two form boxes side by side; apply background-color, border-radius, and box-shadow to style the form cards; style the navigation links and dropdown items using the :hover pseudo-class; and style the input fields and submit buttons with padding, border-radius, and hover-based color changes.
6. Set a background-image with background-size: cover and background-position: center on the section that holds the Sign-In and Sign-Up forms so it fills the width of the page.

7. Add a footer section that displays the organization's address and the copyright text.
8. Save the file, host it using GitHub Pages, and preview it in a browser to verify that the navigation bar, dropdown menu, form layout, and hover effects render as expected.
9. Debug any layout issues and refine the CSS3 styles until the page matches the intended design.

Program:

```
<!DOCTYPE html>
<html lang="en">

<head>

  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>ArtNest - Sign In & Sign Up</title>

  <style>

    * {
      box-sizing: border-box;
    }

    body {
      margin: 0;
      font-family: Arial, sans-serif;
      background-color: #fff8f0;
    }

    /* ----- Header ----- */

    .site-header {
      background-color: #6a1b9a;
      color: white;
      display: flex;
      align-items: center;
      gap: 15px;
      padding: 15px 30px;
    }

    .logo-badge {
      width: 55px;
      height: 55px;
      border-radius: 50%;
      border: 3px solid #ffca28;
      display: flex;
```

```
        align-items: center;
        justify-content: center;
        font-weight: bold;
        font-size: 13px;
    }

    .site-header h1 {
        font-size: 28px;
        margin: 0;
    }

    .site-header h1 .accent {
        color: #ffca28;
    }

    /* ----- Navigation ----- */

    .navbar {
        background-color: #4a148c;
        list-style-type: none;
        display: flex;
        margin: 0;
        padding: 0;
        border-bottom: 2px solid #ffca28;
    }

    .navbar li {
        position: relative;
    }

    .navbar li a {
        display: block;
        padding: 14px 24px;
        color: white;
        text-decoration: none;
        font-weight: bold;
    }

    .navbar li a:hover {
        background-color: #ffca28;
        color: #4a148c;
    }

    .navbar li.active a {
        background-color: #ffca28;
        color: #4a148c;
    }
}
```

```
/* ----- Dropdown ----- */

.dropdown {

</html>
```

Output:

The screenshot displays the ArtNest website interface. At the top, there is a purple header with the 'ART ArtNest' logo on the left and a navigation bar with 'Home', 'About', 'Products', and 'Offers' on the right. The main content area has a light pink background. On the left, there is a 'Sign In' form with fields for 'Username / Email' and 'Password', and a 'Sign In' button. On the right, there is a 'Sign Up' form with fields for 'Full Name', 'Email', 'Password', and 'Confirm Password', and a 'Sign Up' button. The footer is a dark purple bar containing the text 'ArtNest Online Art Supply Store - Coimbatore, Tamil Nadu', '© 2026-2027. (URK24CS1099) - Web Technology Lab · All Rights Reserved.', and 'Designed by THEEPAN SS'.

Result:

The Sign-In and Sign-Up page for the wildlife conservation website was successfully designed and developed using HTML5 and CSS3, including a styled navigation bar with a working dropdown menu, Flexbox-based alignment of the authentication forms, styled input fields and buttons, a background image, and a footer displaying the organization's address and copyright details. The output, hosted on GitHub Pages, matched the intended design with a well-structured header, navigation, dropdown, and side-by-side Sign-In/Sign-Up cards.
